General Advice for Being Physically Active During Pregnancy

Follow the guidance from the United Kingdom's Chief Medical Officers (2019) on the amount and type of physical activity pregnant women should be doing to improve their health: www.gov.uk/government/collections/physical-activity-guidelines

It is recommended that pregnant women accumulate 150 minutes of moderate-intensity physical activity throughout the week and perform strengthening activities twice per week.

If you are planning to take part in vigorous-intensity physical activity, or be physically active at elevations above 2500 m (8200 feet), then consult with a healthcare professional beforehand. If at any time you have questions or concerns about being active during your pregnancy, seek advice from a healthcare professional.
